

Aseel Musaid

Software Engineer

Jeddah, Saudi Arabia | +966535140365 | aseeltwtx@gmail.com
LinkedIn | GitHub | Portfolio

Professional Summary

Software Engineer specializing in data analytics and AI-driven systems. I have a proven track record of transforming complex datasets into actionable insights through Python-based visualization and predictive modeling. My expertise includes developing physics-based digital twins for renewable energy and building intelligent dashboards that optimize business performance.

Professional Experience

PetroLube

Summer Intern – Data & AI

Jeddah, SA

Jun 2025 – Aug 2025

- Developed a Power BI dashboard for sales analysis and business reporting.
- Built a predictive analytics dashboard using Python and Streamlit.
- Generated AI-assisted insights to identify business risks and performance trends.

Education

King Abdulaziz University | Jeddah, SA

B.Sc. Computer Science | GPA: 4.59/5.0

May 2026

Tuwaiq Academy | Remote

ASP.NET Core MVC Bootcamp

Dec 2024 – Jan 2025

- Completed intensive training in ASP.NET Core MVC covering web application development, database integration, authentication, APIs, and GitHub workflow.

Technical Skills

Languages: Python, Java, C#, JavaScript

Data & Visualization: Pandas, NumPy, Streamlit, Plotly, Power BI

Web & Tools: HTML, CSS, ASP.NET Core MVC, SQL Server, GitHub, VS Code

Key Projects

SIRAJ – Digital Twin for Solar Energy Optimization

2025 – 2026

- Developed a physics-based digital twin using pvlib to simulate solar energy generation.
- Integrated NASA POWER data and built an interactive Streamlit dashboard for KPI tracking and AI-generated insights.
- Performed financial analysis including ROI and payback period calculations.

SkillHub – Student Workshops Platform | Full-Stack Web Application Project

2026

- Developed a full-stack workshop platform featuring workshop discovery, booking, search, filtering, and management functionalities.

Optivalue-IVI – Insurance AI Dashboard | Futurethon Hackathon, Bupa Arabia

2026

- Developed front-end features for an AI-powered insurance dashboard, integrating data visualizations and AI-generated business insights.

AI-Powered Sales Dashboard – PetroLube

2025

- Built an AI-powered dashboard to analyze revenue trends, business performance, customer churn, and margin risks for data-driven decision making.

AI Brain Tumor Detection System

2025

- Developed and evaluated a machine learning model for brain tumor detection from medical imaging data, improving diagnostic prediction accuracy.

ExplorKSA – Tourism Web Platform

2024

- Developed a tourism web platform with database integration and dynamic user interfaces to enhance user experience.

Certifications

- Introduction to Data Engineering – IBM
- AI For Everyone – DeepLearning.AI

Languages

- Arabic: Native | English: Advanced
